Hey Bagou450 Thanks for your purchase
First upload the content of panel files folder to your pterodactyl folder

1 - In routes/admin.php at end of file add :

```php
/*
|--------------------------------------------------------------------------
| Bagou License Controller Routes
|--------------------------------------------------------------------------
|
| Endpoint: /admin/bagoulicense
|
*/
Route::group(['prefix' => 'bagoucenter'], function () {
    Route::get('/', [Admin\Bagou\BagouCenterController::class,
'index'])->name('admin.bagoucenter');
    Route::get('/license/', [Admin\Bagou\BagouLicenseController::class,
'index'])->name('admin.bagoucenter.license');
    Route::get('/license/{addon}', [Admin\Bagou\BagouLicenseController::class,
'license'])->name('admin.bagoucenter.license.addon');

    Route::get('/versions/', [Admin\Bagou\BagouVersionsController::class,
'index'])->name('admin.bagoucenter.versions');

    Route::get('/settings', [Admin\Bagou\BagouSettingsController::class,
'index'])->name('admin.bagoucenter.settings');
    Route::get('/settings/{addon}', [Admin\Bagou\BagouSettingsController::class,
'settings'])->name('admin.bagoucenter.settings.addon');

    Route::get('/support/', [Admin\Bagou\BagouCenterController::class,
'settings'])->name('admin.bagoucenter.support');

    Route::post('/license/{addon}', [Admin\Bagou\BagouLicenseController::class,
'setlicense']);

    Route::post('/versions', [Admin\Bagou\BagouVersionsController::class,
'refresh']);

    Route::delete('/license/{addon}', [Admin\Bagou\BagouLicenseController::class,
'removelicense']);

});
```

2 - In routes/api-client.php above « Route::group(['prefix' => '/settings'], function () {
« Add :

```php
    Route::group(['prefix' => '/mcmodpacks'], function () {
        Route::get('/', [Client\Servers\Bagou\Minecraft\ModPacksController::class,
```

```
'getModPacks']);
        Route::get('/mcversions',
[Client\Servers\Bagou\Minecraft\ModPacksController::class, 'getMcVersions']);
        Route::get('/description',
[Client\Servers\Bagou\Minecraft\ModPacksController::class,
'getModpacksDescription']);
        Route::get('/getversionsize',
[Client\Servers\Bagou\Minecraft\ModPacksController::class, 'getversionsize']);
        Route::post('/install',
[Client\Servers\Bagou\Minecraft\ModPacksController::class, 'install']);
    });
```

3 - In app/Transformers/Api/Client/ServerTransformer.php under "'is_transferring' =>
!is_null($server->transfer)" add :

```
            'mcversion' => $server->mcversion,
            'nest_id' => $server->nest_id,
            'egg_id' => $server->egg_id,
```

4 - In resources/scripts/api/server/getServer.ts under allocations: Allocation[]; add :

```
    mcversion: string;
    nestId: number;
    eggId: number;
```

4.1 - In same file after "allocations: ((data.relationships?.allocations as
FractalResponseList | undefined)?.data || []).map(rawDataToServerAllocation)," add:

```
    mcversion: data.mcversion,
    nestId: data.nest_id,
    eggId: data.egg_id,
```

5 - In resources/views/layouts/admin.blade.php above "<li
class="header">MANAGEMENT
" add :

```
                        <li class="{{ ! starts_with(Route::currentRouteName(),
'admin.bagoucenter') ?: 'active' }}">
                            <a href="{{ route('admin.bagoucenter')}}">
                                <i class="fa fa-globe"></i> <span>Bagou
Center</span>
                            </a>
                        </li>
```

6 - In resources/scripts/routers/ServerRouter.ts after "import ConflictStateRenderer
from '@/components/server/ConflictStateRenderer';" add :

```
import { Navigation, ComponentLoader } from '@/routers/ServerElements';
```

6.1 - In same file replace :

```
"
                                {routes.server
                                    .filter((route) => !!route.name)
                                    .map((route) =>
                                        route.permission ? (
                                            <Can key={route.path}
action={route.permission} matchAny>
                                                <NavLink to={to(route.path, true)}
exact={route.exact}>
                                                    {route.name}
                                                </NavLink>
                                            </Can>
                                        ) : (
                                            <NavLink key={route.path}
to={to(route.path, true)} exact={route.exact}>
                                                {route.name}
                                            </NavLink>
                                        )
                                    )}
"
```

By:

`<Navigation />`

6.2 - In same file replace :

```
"
                                {routes.server.map(({ path, permission, component:
Component }) => (
                                    <PermissionRoute key={path}
permission={permission} path={to(path)} exact>
                                        <Spinner.Suspense>
                                            <Component />
                                        </Spinner.Suspense>
                                    </PermissionRoute>
                                ))}
"
```

By :

`<ComponentLoader />`

7 - In resources/scripts/routers/routes.ts after "import ServerActivityLogContainer from '@/components/server/ServerActivityLogContainer';" add :

```
import McModpacksContainer from
'@/components/server/mcmodpacks/McModpacksContainer';
```

7.1 - In same file after "permission: string | string[] | null;" add :

```
nestId?: number;
eggId?: number;
nestIds?: number[];
eggIds?: number[];
```

7.2 - In same file after :

```
"
    {
        path: '/files',
        permission: 'file.*',
        name: 'Files',
        component: FileManagerContainer,
    },
"
```
Add:

```
    {
        path: '/minecraft/modpacks',
        permission: 'file.*',
        name: 'Modpacks',
        nestId: 1,
        component: McModpacksContainer,
    },
```

8 - In resources/lang/en/activity.php above « 'startup' => [« add :

```
        'versions' => [
            'install' => 'Installation of :name',
        ],
```

If you have the Premium version changer addon:

9 - In resources/scripts/components/server/versions/McVersionsContainer.tsx
remove:

```
 <option key={15} value={'modpacks'}>
        Modpacks
    </option>
```

If you don't have yarn install it :

```
apt -y install curl dirmngr apt-transport-https lsb-release ca-certificates
curl -sL https://deb.nodesource.com/setup_16.x | sudo -E bash -
apt -y install nodejs
cd /var/www/pterodactyl
npm i -g yarn
yarn install
```

Add dependencies:

```
yarn add html-react-parser react-markdown
```

And build the panel assets :

```
yarn build:production
chown -R www-data:www-data * #or chown -R nginx:nginx * if you use last nginx
version
php artisan optimize && php artisan migrate --force
```

After activate your addon trough bagou license tab in admin panel.
YOUR LICENSE :
